PORT OF GULFPORT RELEASES VIDEO FEATURING THE ARRIVAL OF THREE NEW SHIP-TO-SHORE GANTRY CRANES, SHOWCASING WHAT THEY MEAN FOR THE MISSISSIPPI GULF COAST

Gulfport, Miss. - The Port of Gulfport has a great story to tell, not only regarding the latest tenant announcements, but also surrounding the progress of the Restoration Project. We are excited to share the following video with our community and the shipping industry, which features the arrival of our new ship-to-shore gantry cranes. The arrival and installation of the new cranes was a momentous moment for the Port's Restoration Project, and we appreciate the many individuals and organizations who have contributed to our overall success to date.

The cranes, which arrived in Gulfport this past March, were welcomed with much excitement and fanfare. At a total cost of \$30 million, these cranes are a significant investment in the Port's infrastructure and have already been put to work servicing Mediterranean Shipping Company vessels for Chiquita, who returned from New Orleans in August.

History continues to be made at the Port of Gulfport and as we go beyond recovery, we can look toward the future and celebrate Mississippi's "Sky-High Progress"!

The video can be found on YouTube at the following link: <https://youtu.be/-pVeUJCoJhY>
